Certificate Import Wizard
Welcome to the Certificate Import Wizard
This wizard helps you copy certificates, certificate trust lists, and certificate revocation lists from your disk to a certificate store.
A certificate, which is issued by a certification authority, is a confirmation of your identity and contains information used to protect data or to establish secure network connections. A certificate store is the system area where certificates are kept.

Security Warning
You are about to install a certificate from a certification authority (CA) claiming to represent:
default
Windows cannot validate that the certificate is actually from "default". You should confirm its origin by contacting "default". The following number will assist you in this process:
Thumbprint (sha1): ECBEC5EA 002C4785 E74D0D00 FFFC559D D130418F
Warning:
If you install this root certificate, Windows will automatically trust any certificate issued by this CA. Installing a certificate with an unconfirmed thumbprint is a security risk. If you click "Yes" you acknowledge this risk.
Do you want to install this certificate?
Yes
No
